HEALTHCARE

Team Support Healthcare Carbon Reduction Plan

Introduction:

Team Support Healthcare was founded with a commitment to providing round-the-clock care while promoting the independence of healthcare staff. As we continue our mission, we recognize the importance of sustainability and our responsibility to reduce our carbon footprint. This Carbon Reduction Plan outlines our initial steps to contribute to environmental conservation in line with industry averages and best practices.

Baseline Assessment: Jan – Dec 2022

Before setting specific targets, we need to establish a baseline assessment of our current carbon emissions. This will include an analysis of our energy consumption, transportation, waste management, and other relevant factors. This assessment will serve as a reference point to measure our progress.

Targets:

1. Reduce Energy Consumption:

- **Target:** Achieve a 10% reduction in energy consumption within the first year.
- **Actions:**
 - Upgrade to energy-efficient lighting systems.
 - Implement smart thermostats and HVAC control systems.
 - Encourage staff to switch off lights and equipment when not in use.

2. Transportation:

- **Target:** Reduce carbon emissions from company vehicles by 15% within the first year.
- **Actions:**
 - Promote carpooling and the use of public transportation for commuting.
 - Consider electric or hybrid vehicles for the company fleet.
 - Encourage virtual meetings to reduce travel.

3. Waste Reduction:

- **Target:** Divert 50% of office waste from landfills through recycling and composting within the first year.

- **Actions:**
 - Implement a comprehensive recycling program.
 - Encourage employees to minimize paper usage and opt for digital documents.
 - Source eco-friendly office supplies.
4. **Promote Green Practices Among Caregivers:**
- **Target:** Educate and encourage independent healthcare staff to adopt eco-friendly practices.
 - **Actions:**
 - Develop training modules on eco-friendly caregiving practices.
 - Offer incentives for caregivers who implement sustainable measures in their work.
5. **Technology Integration:**
- **Target:** Implement a digital platform for scheduling and communication to reduce the need for physical meetings.
 - **Actions:**
 - Develop a user-friendly online platform for caregivers and patients to connect.
 - Promote the use of telehealth services to reduce travel.

Monitoring and Reporting:

Regularly monitor and report on progress toward achieving these targets. Team Support Healthcare will establish a Sustainability Committee responsible for tracking and reporting on key performance indicators related to carbon reduction.

Staff Engagement:

Engage and educate staff about the importance of carbon reduction and encourage their active participation in achieving the goals. Consider setting up a rewards program for employees who actively contribute to sustainability efforts.

Communication:

Regularly communicate our carbon reduction efforts to all stakeholders, including caregivers, patients, and the wider community. Transparency is essential in building support and trust.

Conclusion:

Team Support Healthcare is committed to providing "fine care" not only to our patients but also to the environment. We understand the importance of reducing our carbon footprint, and this initial Carbon Reduction Plan is the first step in our journey towards a more sustainable future. We will continually assess, adapt, and improve our efforts to align with industry averages and best practices for carbon reduction.

Team Support Healthcare.

Publication date: 20th October 2023

Team Support Healthcare. Net Zero Commitment by 2040

At Team Support Healthcare, we are committed to ensuring that our operations have a minimal impact on the environment. We recognize the urgency of addressing climate change and its far-reaching implications. To align with global efforts to combat climate change, we pledge to achieve net-zero carbon emissions by the year 2040. This commitment encompasses every aspect of our organization and reflects our dedication to creating a sustainable and healthy future.

Our Net Zero Commitment:

1. **Carbon Emission Reduction:** We will implement a comprehensive carbon emission reduction strategy that aligns with industry best practices. This strategy will focus on minimizing greenhouse gas emissions from our operations, with the ultimate goal of reaching net-zero emissions by 2040.
2. **Energy Transition:** Team Support Healthcare will transition to 100% renewable energy sources for our operations. We will invest in renewable energy technologies and energy efficiency measures to reduce our reliance on fossil fuels.
3. **Carbon Offset Initiatives:** We will engage in carbon offset programs to compensate for emissions that cannot be completely eliminated. These initiatives will include afforestation and reforestation projects, as well as investments in renewable energy and clean technology.
4. **Sustainable Transportation:** Team Support Healthcare will continue to reduce emissions associated with our transportation activities. This includes adopting low-emission or electric vehicles for our fleet, promoting carpooling, and encouraging the use of public transportation and telecommuting.
5. **Waste Minimization:** We will strive to achieve zero waste by 2040, with a focus on reducing, reusing, and recycling. This will involve responsible waste management practices throughout our organization.
6. **Educational Initiatives:** Team Support Healthcare will educate and engage our staff, caregivers, and patients in sustainability practices. We will provide training and resources to promote eco-friendly behaviors and responsible choices.
7. **Continuous Improvement:** We will continually assess our progress and update our carbon reduction plan to meet evolving environmental standards and targets.

Monitoring and Reporting:

To maintain transparency and accountability, Team Support Healthcare will establish a dedicated Sustainability Committee responsible for tracking, reporting, and verifying our progress toward net-zero emissions. Regular reports on key performance indicators will be shared with our stakeholders and the wider community.

Collaboration:

We will actively collaborate with our suppliers, partners, and the broader healthcare industry to advance sustainable practices and create a collective impact on carbon reduction.

Communication:

We are committed to transparent and open communication about our net-zero journey. We will regularly update our caregivers, patients, and the community on our progress and the steps they can take to support our commitment.

By making this Net Zero Commitment, Team Support Healthcare. aspires to be a leader in our industry and contribute to a more sustainable future for the planet. We understand the importance of mitigating climate change, and we are determined to play our part in achieving a net-zero carbon footprint by 2040.

Emission Reduction Target and Project

Target:

Team Support Healthcare commits to achieving a 50% reduction in our carbon emissions by the year 2030 compared to our baseline emissions. This ambitious target is in line with our ultimate goal of reaching net-zero emissions by 2040.

Project Overview:

To meet this target, Team Support Healthcare will embark on a comprehensive Emission Reduction Project that focuses on various aspects of our operations. This project will encompass the following key initiatives:

1. Energy Efficiency Upgrades:

Objective: Reduce energy consumption and associated carbon emissions.

Actions:

- Conduct an energy audit to identify areas for improvement.
- Upgrade to energy-efficient lighting, heating, ventilation, and air conditioning (HVAC) systems.
- Implement smart building automation systems to optimize energy use.
- Encourage staff to turn off lights, computers, and equipment when not in use.

2. Renewable Energy Transition:

Objective: Shift to 100% renewable energy sources to minimize emissions.

Actions:

- Install solar panels or purchase renewable energy from local providers.
- Explore energy storage solutions to ensure a continuous and sustainable power supply.
- Monitor and report on the transition to renewable energy to ensure accountability.

3. Sustainable Transportation:

Objective: Reduce carbon emissions associated with our transportation activities.

Actions:

- Transition to a fleet of electric or low-emission vehicles.
- Promote carpooling among staff and caregivers.
- Encourage the use of public transportation, biking, and walking for commuting.
- Introduce a telecommuting program to reduce the need for physical travel.

4. Waste Reduction and Recycling:

Objective: Achieve zero waste by minimizing and responsibly managing waste.

Actions:

- Implement a comprehensive recycling program.

- Source eco-friendly office supplies to reduce waste.
- Educate and engage employees on responsible waste management.
- Evaluate the potential for composting organic waste.

5. Sustainable Practices Promotion:

Objective: Encourage staff, caregivers, and patients to adopt eco-friendly behaviors.

Actions:

- Develop and deliver training modules on sustainable caregiving practices.
- Provide incentives for caregivers who implement sustainability measures in their work.
- Educate patients and their families on sustainable healthcare practices.

6. Carbon Offset Initiatives:

Objective: Offset remaining emissions through various projects.

Actions:

- Invest in afforestation and reforestation projects.
- Support renewable energy and clean technology initiatives.
- Partner with recognized carbon offset organizations.
- Monitor and verify the effectiveness of offset projects.

7. Monitoring and Reporting:

To track and evaluate our progress, Team Support Healthcare will establish a Sustainability Committee responsible for ongoing monitoring and reporting. Regular updates will be provided to stakeholders, staff, and the community to ensure transparency and accountability.

This Emission Reduction Project represents our commitment to environmental sustainability and reducing our carbon footprint. It is a vital step toward achieving our net-zero emissions goal by 2040, and we are determined to make significant progress in the coming years.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

¹<https://ghgprotocol.org/corporate-standard>

²<https://www.gov.uk/government/collections/government-conversion-factors-for-company-reporting>

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Christina
